**Contract – Biology Classes  
2006-2007**

The Biology classes at ACS are classes that are designed for sophomores (10<sup>th</sup> grade) because they require a greater degree of organization, maturity, and diligence for success. As a ninth grader, your admission into Biology class was by teacher recommendation. Your admission implies that your previous teacher(s) feel that you are clearly capable of handling the responsibilities of such a class. That said, the Science Department also has determined a need to ask each of you to sign the following contract in order to ensure that no one falls below an acceptable level in the class. Remember that admission into Chemistry for next year will depend on the success that you have in this year's class. Thus, if your work is consistently substandard as determined by the teacher, you may not be recommended to continue on the accelerated track and may be required to move back to the standard track (e.g. to take Physical Science) next year.
